

Optimized for your business: Terms and conditions for site partners

More flexibility, less effort: manage your margin directly. With the newly available terms for site partners, billing with your partners becomes easier, more transparent, and more flexible.

Separate revenue and expenses

Your site partner receives 100% of the income at their charging points. You define conditions separately for each partner: easy handling and less administration

All costs in one invoice

Determine your margin based on the costs you set per site partner.

You can find the terms and conditions here: **Operator > Site partner > Financials**. All price components must be defined at „Invoicing“ step.

Your advantages

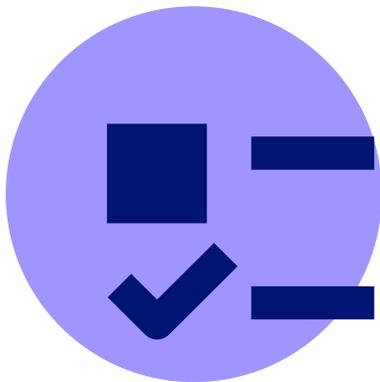

1. Transparent prices per site partner

Instead of maintaining conditions via charging groups, you define prices for your services as an operator once for each site partner. This simplifies complex setups.

2. New price components

Set different prices for normal and fast charging (AC and DC) for each site partner. This applies to the base fee and the usage fee. For transactions via the card terminal or QR code, you can set a different starting price if required. This gives you more leeway to operate your charging business flexibly and economically.

3. Individual costs: Does your business involve costs that are not reflected in the platform? Optional „Other Monthly Costs“ allow you to map your billing model via the platform.

Terms and conditions for site partners: Overview of price components

Available price components of the new terms and conditions for site partners (formerly sub-operators). All values are net values.

Price components	What defines the price component? (Value)	When does this price component apply? (Effect)	Example (Value)
Base Fee (online)	Fee per charging transaction via Pay-t or web payment	For authorization via the Pay-t card terminal or QR code	0.41
Base Fee AC (charger)	Base fee per charge at AC charging point (<50KW)	Applies to authorizations directly at the charger (RFID and Girocard)	0.20
Base Fee DC (charger)	Base fee per charge at DC charging point (≥50KW)	Applies to authorizations directly at the charger (RFID and Girocard)	-
Usage Fee AC (per kWh)	Price per kilowatt hour of energy used at AC charging point (<50KW)	All AC charging processes, regardless of authorization	0.15 EUR
Usage Fee DC (per kWh)	Price per kilowatt hour used at DC charging point (≥50KW).	All DC charging processes, regardless of authorization	0.18 EUR
Pro Rata Price (%)	Percentage of revenue per charge billed to the site partner.	All AC/DC charging sessions and all authorizations; discounts are deducted beforehand	5 At 5% and €10 in sales, the site partner is charged €0.50.
Pro Rata Time Price (%)	Percentage of the total time price per charge billed to the site partner.	All AC/DC charging processes and all authorizations, discounts are deducted in advance	10 At 10% and a total time price of €5, €0.50 is charged to the site partner.
Terminal App Fee	Monthly license fee for using the Pay-t card terminal	Monthly per terminal, regardless of charging processes	€25
Additional Monthly Costs	Additional monthly costs determined individually by the operator	Monthly, costs are shown on the site partner's invoices	20

Info: The two fields "Base Price" and "SEPA transfer price" will no longer be supported in the future. Please do not use them.
